

FORMA

FORMA

With its sophisticated geometric design, Forma inherited the Nova Premiapri mechanism but gave it new life through a typical essential but modern Italian design. Like Combina, Forma is a highly versatile knob. It can be used on wood, crystal or aluminium doors. Its modern look and the metallic finishes are especially suitable for high-tech interiors or for any prestigious location.

COMBINA FORMA

Interaction with the surrounding environment is at the heart of all Meroni knobs. Forma's elegant cut, its modern finishes, the different metallic shades or the resin-made white, grey and black version, fit beautifully with sophisticated offices and meeting rooms.

Elegance and style are just two of Forma's many qualities. Constant research brings together Italian design with top functionality, creating a perfectly efficient and integrated object. Rigour being its key, Forma can be coordinated with Gliss hinges and FormaCombi closet knobs in order to maintain one unique style throughout the whole environment.

FINISHES

Forma comes in a wide range of finishes, including matt or polished gold as well as matt or polished chrome. Also available in sophisticated white, black or grey resin.
